

# FISHERIES NOTICE 2024-08

Issued December 17, 2024

## CALIBRATION BEACON RECOVERY ACTIVITIES

Community Offshore Wind is issuing this notice to inform fishermen, mariners, and other interested parties of the recovery of a calibration beacon from the seafloor within the lease area. The beacon was used to calibrate equipment during geotechnical survey activities conducted during the summer and fall.

The M/V NORTHSTAR NAVIGATOR will retrieve the beacon using a Remotely Operated Vehicle (ROV) deployed from the vessel. Recovery operations will take less than a day, and are anticipated to occur in mid-January. The beacon is located at 39° 39.644' N, 73° 17.229' W.

As described in [Fisheries Notice 2024-07](#), all survey operations for 2024 were completed at the end of October. No additional survey activities will be conducted during retrieval of the calibration beacon.

### M/V NORTHSTAR NAVIGATOR

Vessel Flag: USA

MMSI: 366766000

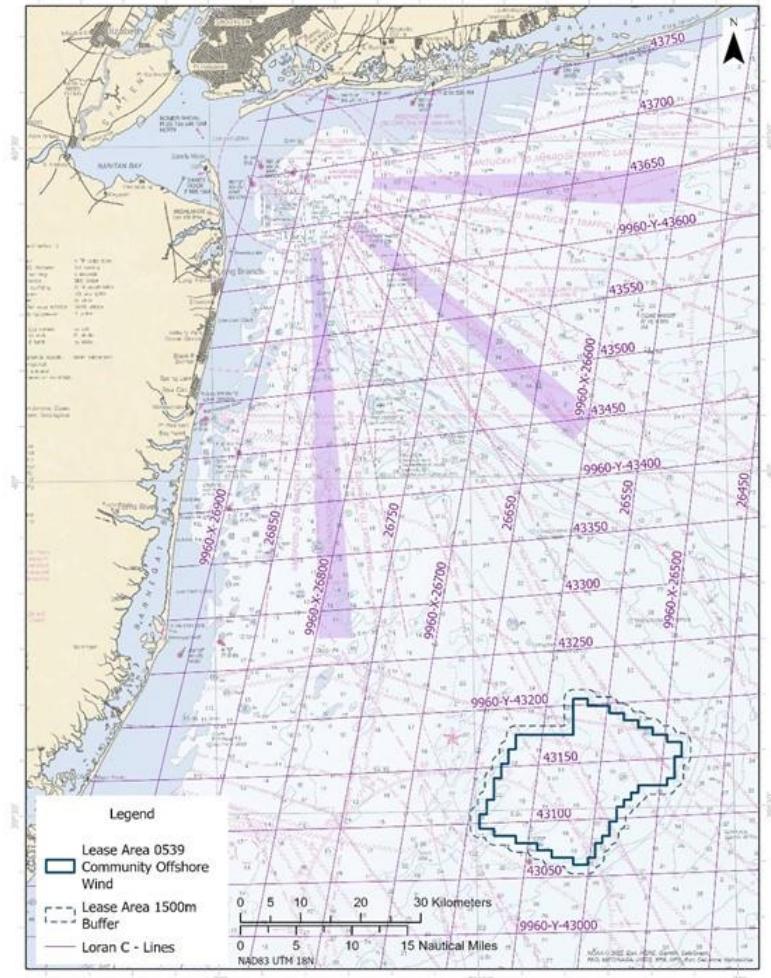

VHF: Channel 16

Bridge phone: +1 609-741-6228

Email: [nsnavigator@nstarmarine.com](mailto:nsnavigator@nstarmarine.com)

Call sign: WDG3786

LOA: 265 ft

The lease area is located 32 nautical miles east of Barnegat Inlet, NJ and 56 nautical miles south of Long Beach, NY. Survey activities that may be undertaken in the future will be described in upcoming fisheries notices. Fishermen and interested parties are encouraged to contact Sean Lucey and Michelle Duval with any questions.
